Introducing the Latest 5000S | Control System

Greetings!

Why are the controls so important?
Quantum's proprietary control technology

is essentially the brains of the entire stabilizer system. The new 5000S control system is the smartest one yet!

It uses a plug in/add on modular platform that effectively supports old, current and future control systems, configurations and algorithms. It is also capable of executing underway only, retractable and zero speed™ functionality. The 5000S features optional, secured remote access, recording capabilities that can store performance data, then download it later and a customizable glass bridge interface. A “quantum” leap in control technology!

F45 Hybrid Power Unit - Going Green

A new, sustainable power pack! With a prototype under development and a patent pending, Quantum is introducing the F45 Hybrid, a very unique, hydraulic/electric power pack. The Hybrid uses the best attributes of both a traditional hydraulic system and a direct electric drive.

There are several advantages to the F45: it is 60% more efficient, features low airborne and structure born noise levels, minimal heat generation and low maintenance requirements. The new power unit will be available in June 2023.

FRC - Emlen Tunnell Commissioning

Fast Response Cutter (FRC) – Bollinger Shipyards – Quantum had the honor of sponsoring the commissioning ceremony of the 45th FRC (Fast Response Cutter) - Emlen Tunnell. All FRC's are named after fallen heroes, giving deep meaning to each vessel and those who serve on them.

Your Best Quantum Story | [Tell Us Now](#)

And the WINNER is?

We are hosting a contest for the BEST Quantum Stabilizer story. Since 1985, Quantum has been supplying stabilizers to 1000's of vessels... Over the years, we have heard plenty of great stories, but there are many more to be told!

We are inviting you to share your experiences, hopefully, with a happy ending.

Here are the parameters:

- Tell your most memorable Quantum Stabilizer Story
- Privacy concerns? There is no need to mention names or boat names. Perhaps LOA - 60m vessel...
- Winner receives \$500 Gift Card
- Deadline is 30 November, 2022
- Contest details on Quantum's Website: [Contest Details](#)
- Format: Text, photos and/or video - YouTube & Vimeo are preferred platforms
- 500 words or less & video of 3 min or less.
- Send video links, copy and/or images to kross@quantumstabilizers.com
- Quantum internal judging committee to decide the winner

By entering you are giving Quantum permission to post the stories on the Quantum website and Quantum social media. This is your chance to be RICH & FAMOUS. May the best story win!

Quantum Sponsors **Dragon Reef**

Quantum Marine Stabilizer Control Systems

Quantum sponsored Andrew Hall, a local Boy Scout, to design and build an artificial reef off the coast of Fort Lauderdale. After a submarine ran aground at Memphis Reef in 1992, there has been an effort to rebuild new reefs in that area. Working closely with the Coastal Conservation Association of Florida, the new "Dragon Reef" is an example of how one idea, can ignite a community!
