

QP6060 Mk0 Hydraulic Power Unit

DESCRIPTION

The hydraulic power unit provides the fluid power necessary to articulate the stabilizer fins. Quantum power units can be paired with a variety of stabilizer hull unit sizes and quantities based on vessel requirements providing a multitude of arrangement options.

Designed to consolidate maximum machinery output into a small footprint, this compact unit can be easily positioned into tight machinery spaces. The QP6060 Mk0 power unit consolidates on a single skid the hydraulic drive train on an aluminum frame with drip tray, stainless steel oil reservoir with associated gauging and sensors, as well as return filtration and oil coolers.

FEATURES:

SIMPLE INSTALLATION: The QP6060 Mk0 is designed to incorporate maximum hydraulic function within a single “plug and play” assembly. Thus, straight-forward connections for mechanical installation, as well as hydraulic and cooling pipe work are at the heart of the QP6060 Mk0 design.

EFFICIENT: The power unit only draws the minimum power necessary to operate the hydraulic components on demand, thus reducing the load on the vessel’s electrical power and cooling systems.

MINIMAL NOISE: Quantum’s power units with Moog™ radial piston pumps, utilize a four-point isolation system to bring both noise and vibration levels down. Hydraulic noise suppressors are attached directly at pump discharge to minimize hydraulic noise in the pipes.

APPEARANCE: The durable high gloss paint finish, polished stainless steel tubing and black anodized reflects the attention to detail, resulting in exceptional fit and finish.

Operating Capacity*	89kW (120hp)
Operating Pressure	207bar (3000psi)
Tank Capacity	693L (183Gal)
Length (overall)**	2010mm (80")
Height (overall)**	1781mm (71")
Depth (overall)**	1473mm (58")
Weight Inc. (dry)	2265kg (4993lbs)
