

## XT T4 Hydraulic Power Unit

### DESCRIPTION

The next generation hydraulic power unit is a machine that provides the fluid power necessary to operate a hydraulic component. Quantum's XT™ Type 4 Hydraulic Power Unit (HPU) is designed specifically to supply hydraulic power for Quantum's Extendable (XT™) fin system. Each XT™ Type 4 HPU can provide hydraulic power for one or two XT™ fins depending on fin size.

The two major components of the HPU, the electrical control box and oil reservoir, are mounted, pre-wired, and pre-plumbed on a panel for simplified installation. The two components can be removed from the panel and separately installed for additional installation flexibility.

### FEATURES:

**SIMPLE INSTALLATION:** The XT™ Type 4 is designed to minimize connection requirements, with only a few connection points required for mechanical installation and hydraulic pipe work.

**EFFICIENT:** The power unit operates only as required and draws the minimum power necessary to operate the hydraulic components on demand, thus reducing the load on the vessel's electrical power system.

**APPEARANCE:** The durable high gloss paint finish, polished stainless steel tubing and black anodized reflects the attention to detail, resulting in exceptional fit and finish.

**ENVIRONMENTAL AWARENESS:** The XT™ HPU together with the underwater XT™ fin hydraulic cylinder form a completely separate hydraulic system. Thus, bio-friendly hydraulic oil may be used to power the XT™ cylinder to minimize any possible impact on the environment.

*Equipment is covered by Quantum's 1-year comprehensive warranty.  
Service and technical support are available worldwide.*

Operating Capacity*	2.1W (2.8hp)
Operating Pressure	185bar (2700psi)
Tank Capacity	693L (183Gal)
Length (overall)**	660mm (26")
Height (overall)**	1075mm (43")
Depth (overall)**	449mm (20")
Weight Inc. (dry)	118kg (260lbs)
